

Sanket Shah

Jersey City, NJ | sanketshah412000@gmail.com | +1 (551) 229-6016 | [LinkedIn](#)

Skills

Programming Languages: C, C++, Java, Python, R, Scala, JavaScript, TypeScript, HTML, CSS, SQL

Big Data and Cloud: Spark, BigQuery, AWS SageMaker, GCP, Maven, Azure ML Studio, Power BI, Tableau, Hadoop

Frameworks: Streamlit, Dash, Next.js, Scikit-learn, TensorFlow, PyTorch, LangChain, LangGraph, Fast APIs, React

Database and warehouse: MySQL, NoSQL, PostgreSQL, Snowflake, PL/SQL, Pinecone, Pgvector

MLOps Tools: Docker, Kubernetes, Kubeflow, Vertex AI, MLflow, OpenShift, GitHub Actions, CI/CD

Machine Learning: Regression, Bayesian learning, NLP, CNN, RNN, LSTM, LLMs, RAG, Generative AI

Experience

Data Scientist | WPP Media | New York City, NY

March 2025 – Present

- Engineered a Dash-based audience builder app that compiles nested rules into SQL across 4.5B+ consumer records
- Trained, deployed, and monitored 20+ ML models for scoring audience propensities for global brands
- Ran Kubeflow pipelines for Fusion-as-a-Service, supporting feature engineering and donor-recipient data fusion
- Built the agentic orchestration and QA layer for a Geo-Experimentation platform using Vertex AI, React, and FastAPI, automating statistical experiment design that previously required deep expertise

Data Scientist | Third Estate Ventures | Jersey City, NJ

January 2024 – February 2025

- Enhanced fund allocation efficiency by 20% by building an annotation software for 10,000+ property images
- Improved trend identification by 40% by training ML models to extract insights from real estate data
- Built a RAG pipeline combining structured market data and unstructured property reports for trend analysis using Hugging Face and AWS Lambda
- Improved the quality of reports by 35% by leveraging LLMs to generate detailed property descriptions and insights

Software Engineer | Cloudserve Systems | India

May 2021 – August 2022

- Processed 100K+ EHR documents monthly by building HIPAA-compliant AI systems for healthcare data, including BERT-based clinical document summarization and NER pipelines
- Strengthened disease modeling by integrating Epic Clarity EMR data with high-dimensional omics features
- Developed a tool to monitor services like S3, EC2, DynamoDB, etc., by building an auditing tool for AWS with Flask

Projects

TodaySponsor - AI-Native Influencer Matching Platform

todaysponsor.dev

- Built a two-stage matching engine using 1,555-dimension embeddings and pgvector, ranking creators by audience-to-customer overlap from Shopify CRM data ingested via OAuth
- Replaced follower-count heuristics with distribution-level lookalike modeling using decomposed cosine similarity across demographics, geography, and content
- Automated creator outreach and campaign strategy using LangChain, LangGraph, and GPT-4o agents with secure Shopify OAuth (HMAC, CSRF, scoped tokens)

Education

Stevens Institute of Technology, Hoboken, NJ, USA – Master of Science in Computer Science

January 2024

Ahmedabad University – Bachelor of Technology in Information and Communication Technology

May 2022
